

## Introduction to Generative AI with AWS

### Project Documentation Report

Visit [UDACITY Introduction to Generative AI with AWS Project Documentation Report](#) to make a copy of this document.

Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
<b>Step 2: Domain Choice</b> What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: <ol style="list-style-type: none"><li>1. Financial</li><li>2. Healthcare</li><li>3. IT</li></ol>	Financial Domain
<b>Step 3: Model Evaluation Section</b> What was the response of the model to your domain-specific input in the <b>model_evaluation.ipynb</b> file?	<b>Input 1:</b> The investment tests performed indicate <b>Response 1:</b> that the proposed method is suitable for the design of an MIMO-OFDM system for the wireless communications. AB - The design of a wireless communications system is performed by using the method of moments. The performance of the system is evaluated by using the spectral efficiency and the bit error rate. The performance  <b>Input 2:</b> The results are encouraging for aggressive investors <b>Response 2:</b> who can stomach the risk and volatility. The chart below shows the performance of the S&P 500 over the past 10 years. Notice how the S&P 500 is down about 20% in 2008, up 5%
<b>Step 4: Fine-Tuning Section</b> After fine-tuning the model, what was the response of the model to your domain-specific input in the <b>model_finetuning.ipynb</b> file?	<b>Input 1:</b> The investment tests performed indicate <b>Response 1:</b> that the proposed system is an efficient solution for the detection of the anomalies in the power grid. Keywords: Power grid, anomalies, wavelet transform, neural networks, support vector machine, genetic algorithm. 2558 A Study on the Effect of the Fiber Optic S

	<p><b>Input 2:</b> The results are encouraging for aggressive investors</p> <p><b>Response 2:</b> .</p> <p>Following the release of the latest quarterly results, the analysts have updated their consensus estimates for the current fiscal year. The consensus estimate for revenue has been \$2.52 billion by 1 analysts. That is compared with the official figures by the company which</p>
